ARCHITECTURE BOOK

ABOUT

Design Skill Awards · Bronze Winner 2025

Portuguese awarded architecture and design studio located in Lisbon. Founded in 2015 by architects Cristina Vieira de Matos Fonseca and Emanuel Valente de Sousa.

Our work reflects the pragmatic vision with which it approaches challenges, appealing to the sensitivity of its clients for a new way of looking at and perceiving space in its sensory dimension, always exploring new materials and ways of living.

The studio bases its practice on the constant exploration and search for new paradigms in contemporary architecture, in order to achieve a connection between the challenges proposed and tectonic balance, aiming to transform space into a personal and unique experience, capable of surprising and exceeding expectations.

In addition to the projects presented in the following portfolio, Studio A+1 has developed large-scale, high-visibility projects in Angola, namely two buildings for the Ministry of the Interior on the Luanda waterfront, the headquarters of the company Soclima in Talatona, and the headquarters of EY, among others.
